

Clinical Cases for Training

Diagnosis/Treatment Quandaries

With the advent of Metabolic Medicine as sub specialty in general medicine or chemical pathology, there is a need to develop a training session. It should be beneficial to paediatricians in training and to clinical scientists in training. It is proposed to have a training session on the morning of 1st July 2004, preceding the National Meeting which will be open to all trainees.

We will have a series of cases with diagnostic quandaries or management issues which would be of interest to other trainees. To give some structure, Dr. Graham Shortland, Dr. Mike Henderson and Dr. Peter Galloway will be present to guide and direct discussion.

The meeting will start at 9.30 a.m. and will finish shortly after 12 noon, with a 20 minute coffee break just before eleven.

The cost of this extra meeting is £15.00, but is free to anybody who is willing to present a case.

I would be grateful if you could submit a brief outline of the case you wish to present **by 1st May** so that a programme can be drawn up. This will be distributed to all those who have registered for the Training Meeting.

Dr. Peter Galloway

I,(Name)

from(Hospital)

wish to attend the Training Day.

I wish to present a case or

I enclose a cheque for £15 made payable to 'BIMDG Meeting Fund R009997.

Please return form by 1st May 2004 to Mrs. Irene Macpherson, Department of Biochemistry, Royal Hospital for Sick Children, Yorkhill, Glasgow, G3 8SJ
